Presented by the Department of Medicine, Brigham and Women's Hospital and the Department of Global and Continuing Education, Harvard Medical School. In the United States and around the world, there has been growing recognition of the marked disparities in access to and delivery of health care depending on one's gender, race, socioeconomic status, and country of residence. This can lead to major inequities in health care outcomes, and devastating personal, public health, and global consequences.

In these new and timely courses, disparities and inequities in health and health care will be explored from diverse perspectives, bringing together researchers, clinicians, and educators who are the premier leaders in their fields.

- [Introduction to the Mechanisms of Health Disparities](#)
- [Recognizing Global Health Care Disparities](#)
- [Researching Disparity: Methodology and Models](#)
- [Caring for Refugees and Asylum Seekers](#)
- [Health Care Access and Delivery in the US](#)
